

wood USB drives

Wood USB Drives are available with 8GB or 16GB capacity, and are the perfect option for delivering your clients images in a customized way. Add your logo, your clients name, or a custom graphic to your design and make each USB drive you order completely unique.

All USB's come with Front Engraving as the default and you can upgrade to include Front and Back for an additional fee of \$2.50.

SIZE	FRONT ENGRAVING	FRONT AND BACK ENGRAVING
8 GB	\$20.25	\$22.75
16 GB	\$24.50	\$27.00

LOGOS + TEXT

The engraving process doesn't handle shades well, so for the best results we recommend only black and white logos or text. No color engraving is available.

Please note that any white information or white backgrounds in your design will show up as the wood on the final USB.

SIZING AND FILE PREPARATION

Files should always be designed using our guide, and must be submitted as JPG files in an RGB colorspace.

Files should be sized at 2.625" x 1.375" @1200 DPI for optimal quality.

PSD Guides are available on the website to show you where the cap is located on the front and back of the final USB.
